

MULLER-MARTINI

4th & 5th Knife Attachment

for Trimmer Models DSS/890, 217, 1522 & 251

The 4th and 5th Knife Attachment can be mounted on the trimmer for 2-up production. It offers the choice of splitting the book (split cut) or trimming out the center (e.g. bleed trim), depending on individual job requirements. Only a few steps are needed to mount the unit. A set-up gauge reduces makeready. Heavy-duty construction provides the stability needed to assure long knife life.

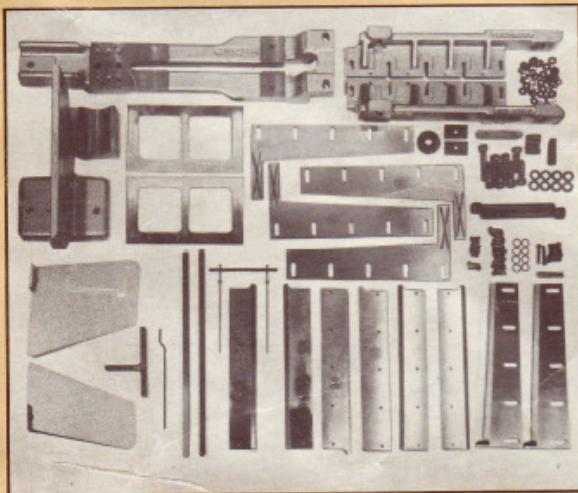

The 4th and 5th Knife can be purchased with the machine or may be added later. It includes: 2 complete sets of knives (total of 12 knives) for:

Split Cut

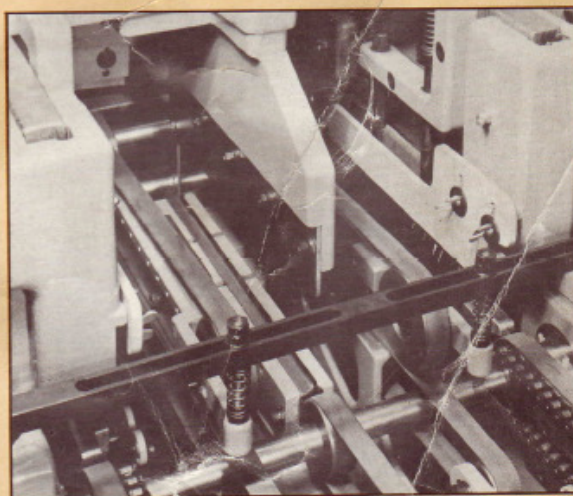

2 bottom knives, 2 top knives

Trim-Out

2 each bottom knives, left and right
2 top knives 5/32", 2 top knives 1/4"

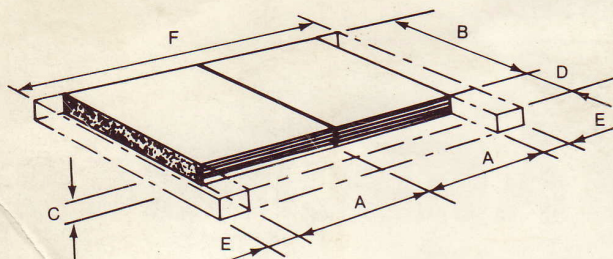

The 4th and 5th Knife Attachment includes: required mounting brackets, set-up gauge, and 2 complete sets of knives (total of 12 knives).

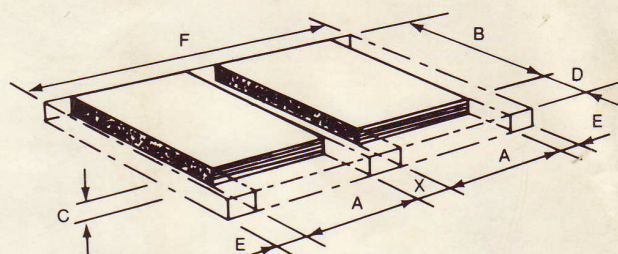

The 4th and 5th Knife mounted on the Model DSS/890 Trimmer for 2-up production.

Doubles Production

SPLIT CUT

TRIM-OUT

X: Standard supplied knives are for 5/32" and 1/4" trim-out.
